Collaborative Research Project

W I N D O W S

Documentation, survey and fruition of
the architectural heritage of Berat in Albania

The Collaborative Research Project between the Department of Architecture and Industrial Design of the University of Campania Luigi Vanvitelli (Italy) and the Polytechnic University of Tirana (Albania) proposes the knowledge and graphic and theoretical documentation of the UNESCO site of Berat, located in south-eastern Albania. Since July 2008, it has been a World Heritage Site as a rare example of a well-preserved Ottoman city. The city is characterised by its division into three historical districts: Kala, Mangalem, Gorice, which are similar in terms of the type of buildings, but different in terms of location. The phase of the research involves a series of phases of documentation and knowledge of both the urban scenes and the architectural landmarks identified in the three historical districts of Kala, Mangalem, Gorice. Attention is also paid to the castle, religious architecture and the medieval bridge.
